# **Fusion Inventory:**

Mettre dans le bon répertoire dans le server linux (GLPI) :

```
glpi@glpi:~$ cd /var/www/
glpi@glpi:/var/www$ {
    html
    glpi@glpi:/var/www$ ls
    html
    glpi@glpi:/var/www.yc td html
    glpi@glpi:/var/www.yc td html
    glpi@glpi:/var/www.yc thtml
    glpi@glpi:/var/www.yc tht
```

Chercher le plugin du fusion Inventory : <a href="https://github.com/glpi-project/glpi-inventory-plugin/releases/download/1.5.3/glpi-glpiinventory-1.5.3.tar.bz2">https://github.com/glpi-project/glpi-inventory-plugin/releases/download/1.5.3/glpi-glpiinventory-1.5.3.tar.bz2</a>

```
Spingpli:/var/new/html/glp:/pluginss udo wget https://github.com/glp.roject/glp.inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-1.5.3.tar.bz2 - 2-205-95-7 1273:148 - https://glp.inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-1.5.3.tar.bz2 - 2-205-95-7 1273:148 - https://glp.inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-1.5.3.tar.bz2 - 2-205-95-7 1273:148 - https://glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-plugin/releases/dom/load/1.5.3/glp:-glp:inventory-1.5.3.tar.bz2 | dom/load/1.5.3/glp:-glp:inventory-1.5.3.tar.bz2 | dom/load/
```

## Décompressé le fichier :

```
glpi@glpi:/var/www/html/glpi/plugins$ ls
glpi-glpiinventory-1.5.3.tar.bz2
glpi@glpi:/var/www/html/glpi/plugins$ sudo tar -xvjf glpi-glpiinventory-1.5.3.tar.bz2
```

### Installation du plugin dans GLPI:

### Activation du plugin :

#### Pour voir quel plugin on a activé cliquer sur oui :

GLPI fournit un nouveau marketplace pour télécharger et installer des plugins.

Voulez-vous remplacer la page de configuration des plugins par l'interface du Marketplace?

Configuration du pluging : configuration de l'inventaire réseau

Mettre le SNMP (Simple Network Management Protocol) a 15s cela permet de déterminier combien de secodnes GLPI attend une réponse d'un périphéque SNNMP avant d'abandonner la requete.

Installation de L'agent GLPI Inventory sur les postes windows :

C:\Users\Administrateur.WIN-V1KTGI8K1CV>net share GLPI-Inventory=C:\GLPI-Inventory /grant:"Tout le monde",READ GLPI-Inventory a été partagé. Crée une nouvelle GPO: Configuration Ordinateur > stratégie > Parametre du logiciel.

Ensuite faites un clic droit > nouveau > Package ensuite renseigner le dossier partager.

Renseignemant de l'adresse IP du server

## Créeation du tag:

### Activation de l'inventaire : administration > Inventaire

## La regle est bien actif:

On peut voir que le client est bien dans l'inventaire.

Il s'agit bien du poste client
